## Background

Zanab Mai is a widow with 6 children. She lost her husband in 2006 to heart failure. With no support from the government and her extended family being in a similar position to her, she was forced to move to higher grounds and moved to the village Kotla Naseer with her 2 children. She lost one child to high fever and not being able to afford medical treatment. She was identified as a high priority case by our field representatives. Living in makeshift accommodation on land donated to her by a family member she is supporting her family by working the land in the nearby fields. Recognizing it impossible for a widow with such poor means to ever raise the capital to build a permanent structure for her family her case was brought to the attention of ANSAR foundation. Her case was presented to our UK donors and the capital required to build a one a bedroom house for Zanab Mai was donated to become a Sadaqa Jariya from the late Syed Mumtaz Ali Shah and Syeda Farhat Begum.

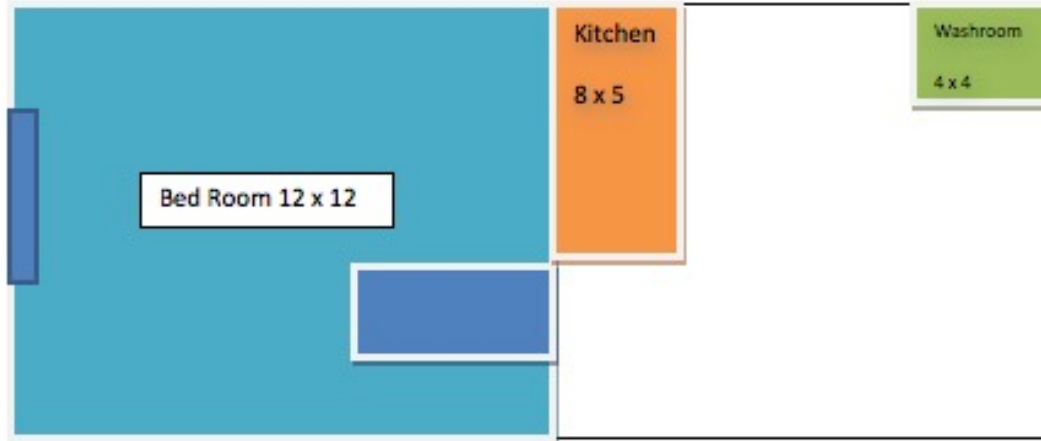

Widow's Old House. She is dependent on her disabled brother

She was living with her disabled brother and his family. With the house complete Zanab Mai has now moved in with her 1 child. As a mother she now has a humble home and permanent roof over her child's head. This has alleviated a massive burden from her head and also provides her child and herself a safe, hygienic and warm environment. Presented in this completion reports are photos of Zanab Mai and her family in the house provided to them from your generous donations. We have also included the approximate costing and proof of purchase for building materials as our duty of providing full accountability to the donations you have trusted us with.

## Plan and description of the house

The construction plan for the widow's house comprises one room (12 x 12 ft), kitchen size (8 x 5 ft) and a wash room size (4 x 4 ft). The Boundary wall is not include in our budget and there is no electric water pump only a hand pump also installed.

## Estimated Cost for One Room

S.No	Name of Item	Amount (PKR)
1	Bricks	29750
2	Cement 480 x 20	9600
3	Crash (foundations) , for floor and Door Level	1500
4	Iron Rod	1250
5	Soil/Mud	2200
6	Sand	2700
